

Sprint 1 Report
Fam
Group 19
Sprint Completion: April 28, 2017

- Actions to stop doing:

- We should stop assigning an over encompassing task for front-end and back-end to one member. This led to partial completion of user stories, but only few that were fully complete.
- We should stop making scrum meeting times be flexible. This led to people coming to meetings late. It also made scrum meetings last longer than 20 minutes.

- Actions to start doing:

- Be more proactive in learning technologies required for project. There are many new technologies we must learn for the project and each team member should start looking into tutorials at least once a day.
- Be more intentional in communicating progress, issues, etc. Other than at the scrum meetings, we rarely updated each other with our progress. We should start documenting every progress we make so that every team member will know who is working on what.
- Group/Pair programming. Aside from scrum meetings, we should set up a meeting devoted to actual coding.

- Actions to keep doing:

- Have scrum meetings 3 times a week. This helps every team member stay on task. Sharing and updating each other with their tasks since the last meeting enables us to know if everyone is doing what they are supposed to be doing.
- Keep learning new technologies. There are more to learn for sprint 2, therefore the effort to learn new technology will become crucial.

- Work completed/not completed:

- Completed

- As a developer, I want to use the google map api so that we have a map to build off the project
 - As a developer, I want to use mongodb so that we can have a database of all users and groups

- As a user, I want a signup page so that I can create an account on the application
- As a developer, I want to host the application using Amazon Web Services

Not Completed

- As a user, I want a homepage that has the overview of the application before creating an account
- As a user, I want a login page

• Work completion rate:

- Total user stories completed: 4
- Total work hours completed: 28
- Total days during sprint: 18
