Goal: For this sprint, we want to be able to register users and set up the general structure of the application

Task Listing:

(8) As a developer, I want to use the google map api so that we have a map to build off the project
- ❑ Task 1: Grab the google maps API as a starting ground for everyone
- ❑ Task 2: Link everything together so that all other users stories will work together

(5) As a developer, I want to use mongodb so that we can have a database of all users and groups
- ❑ Task 1: create a database for all users
- ❑ Task 2: create a database for groups of users

(5) As a user, I want a homepage that has the overview of the application before creating an account
- ❑ Task 1: display information about the application
- ❑ Task 2: have a register button that links to the signup page

(8) As a user, I want a signup page so that I can create an account on the application
- ❑ Task 1: create UI for signup page
- ❑ Task 2: store user information in the database once registered

(8) As a user, I want a login page
- ❑ Task 1: create UI for login page
- ❑ Task 2: connect user and password to database

Team Roles:

- Bryan Ko: Product Owner
- Anthony Lee: Developer
- Vincent Wu: Developer
- Joey Liu: Developer
- Kaitaku Takeda: Developer

Initial Task Assignment:

- Everyone: Learn mean stack, HTML, Bootstrap
- Bryan: Integrate google maps api
- Vincent: Create database for users and groups
- Joey: Create a UI for homepage
- Kaitaku: Create signup page
- Anthony: Create login page
