Sprint 1 Plan
Fam
Group 19
Sprint Completion: April 28, 2017
v1.0.0, 04-20-2017

Goal: For this sprint, we want to be able to register users and set up the general structure of the application

Task Listing:

(8) As a developer, I want to use the google map api so that we have a map to build off the project
   - ❏ Task 1: (2hrs) Grab the google maps API as a starting ground for everyone
   - ❏ Task 2: (5hrs) Link everything together so that all other users stories will work together

(5) As a developer, I want to use mongodb so that we can have a database of all users and groups
   - ❏ Task 1: (3hrs) create a database for all users
   - ❏ Task 2: (3hrs) create a database for groups of users

(8) As a developer, I want to host the application using Amazon Web Services
   - ❏ Task 1: (5hrs) Have a live server running

(5) As a user, I want a homepage that has the overview of the application before creating an account
   - ❏ Task 1: (2hrs) display information about the application
   - ❏ Task 2: (2hrs) have a register button that links to the signup page

(8) As a user, I want a signup page so that I can create an account on the application
   - ❏ Task 1: (2hrs) create UI for signup page
   - ❏ Task 2: (4hrs) store user information in the database once registered

(8) As a user, I want a login page
   - ❏ Task 1: (2hrs) create UI for login page
   - ❏ Task 2: (4hrs) connect user and password to database
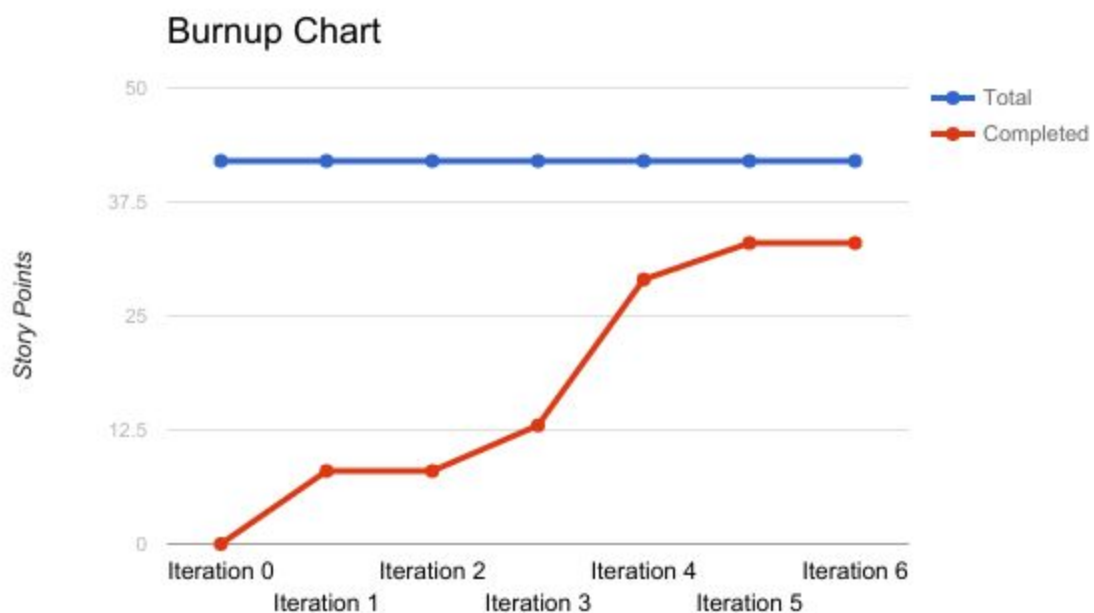

Team Roles:

   - Bryan Ko: Product Owner
   - Anthony Lee: Developer
   - Vincent Wu: Developer
   - Joey Liu: Developer

- Kaitaku Takeda: Developer

Initial Task Assignment:

- Everyone: Learn mean stack, HTML, Bootstrap
- Bryan: Integrate google maps api
- Vincent: Create database for users and groups
- Joey: Create a UI for homepage
- Kaitaku: Create signup page
- Anthony: Create login page

Initial Burnup Chart:
